DATASHEET

General data

The diagonal cutter from EFB-Elektronik is designed as a polished version for cable and wire and offers a practical solution for precise cutting work in the installation environment.

• Diagonal cutters for cable and wire – Covers typical applications in the processing of conductors and supports versatile use in everyday work.
• Insulated design with plastic sleeves – Ensures safe handling and improves grip comfort during repetitive work.
• Max. AWG 20 – Suitable for common conductor cross-sections up to 20 AWG and supports flexible processing of different cable types.

Technically, it is an insulated side cutter with plastic sheaths, which is intended for cables and wire. The polished design complements the functional design with a clean, practice-oriented surface. The design up to a maximum AWG 20 covers a common ladder area.

Technical details
• Brand: EFB-Elektronik
• Variant: Side cutters
• Variation group: polished side cutters
• Suitable for: Cable and wire
• Handle cover: plastic covers
• Insulated: Yes
• Max. AWG: 20
