

DATASHEET

General data

This universal fiber optic cable is ideal for LAN, MAN and WAN backbones, both indoors and outdoors. It can be laid directly in the ground (in a sand bed) or in pipes and offers effective rodent protection.

The stranded, gel-filled loose tube ensures reliable, structured cabling. With a metal-free, longitudinally watertight construction and a tensile strength of 5.0 kN, it is particularly robust.

The halogen-free, flame-retardant jacket complies with IEC60332-1 and Eurobrand class Eca, which also makes it safe for indoor use. The cable exceeds the requirements of EN50173-1 and ISO/IEC11801, ideal for high-performance networks.
