DATASHEET

General data

The cable support strip from EFB-Elektronik is designed for lateral mounting on the 19" profile rails and supports orderly routing as well as strain relief of cables by means of cable ties or Velcro tape. With its slim design, it is suitable for practical use in universal cabinet environments.

- Orderly cable routing on the side of the 19" profile rail for a clear structure in the structure
- Effective strain relief by means of cable ties or Velcro tape for safe cable routing
- Robust steel design with galvanized surface for professional use

The construction is designed for functional cable support in professional installations. The steel material ensures stability, while the galvanized surface underlines the metallic character of the strip. With a width of 18 mm, the design remains compact and fits into the structure to save space.

Technical details
- Brand: EFB-Elektronik
- Category: Cable Interception
- Cabinet Series: Universal
- Design: Cable support
- Construction/use: For lateral mounting on the 19" profile rails. Orderly installation and strain relief by means of cable ties or Velcro tape.
- Width: 18 mm
- Colour: metallic
- Surface finish: galvanized
- Material: Steel
- Scope of delivery: 1 x cable interceptor strip
