DATASHEET

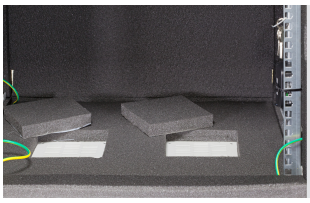

General data

The 19" wall enclosure 12 U of the EFB-Elektronik brand is designed as an acoustically insulated enclosure for noise reduction of active devices. The inner lining with special acoustic foam and the active air ducting with two decoupled Super Silent fans combine sound insulation and reliable ventilation for use in the network and IT environment.

• Acoustically insulated inner lining with special acoustic foam and typ. 8..25 dB attenuation – Reduces the noise level of active components and improves suitability for office-level operation.
• 2 decoupled Super Silent fans with 196 m³/h converted air volume – Supports effective active cooling with low acoustic load.
• Glass door made of certified safety glass and openable, lockable side panels – facilitates visual inspection and protects the installed technology during operation.

The cabinet is designed for 19-inch components with 12 U and measures 600 mm in width, 600 mm in height and 500 mm in depth. The installation depth is 400 to 500 mm. A welded frame, the L-shaped profile rail and the powder-coated surface in grey or RAL 7035 form the mechanical basis. The active ventilation with 196 m³/h and the floor cable

entry with 250 x 70 mm support orderly operation. The front door with safety glass, the replaceable door hinge and the optional PHZ upgrade round off the equipment.

Technical details
- Number of doors: 1
- Type of ventilation: active
- With earthing: Yes
- With roof panel: Yes
- With front door: Yes
- With side panels: Yes, openable, lockable
- Mounting level: front
- Front door version: glass door with latch lock and viewing window made of certified safety glass (4 mm)
- Front door opening angle: > 120°
- Replaceable profile half-cylinder in front door: optional (compact swing handle item no. 699989)
- Scope of delivery: 1x cabinet, 1x plug-in power supply for the fans, 2x keys
- Packaging: Supplied in transport packaging
