DATASHEET

General data

Pull-out splice box from EFB-Elektronik for structured pick-up of splices and for clear management of multimode fibre optic connections in a 19-inch rack. The 1U version is designed for OM3 multimode 50/125 and combines pre-assembled SC duplex couplings with a service-friendly, pull-out design.

• 1U, 19-inch extendable design – Allows for compact integration into the rack and makes it easy to access the splice level for maintenance and installation.
• Front panel with 6 SC duplex couplings and 6 blanking plugs – Ensures clean, pre-assembled assembly and keeps unused positions neatly sealed.
• 12 SC pigtails with 2 m length and LSZH jacket – Support orderly splicing organisation and reduce installation effort.

The splice box combines a sheet steel housing in grey according to RAL 7035 with an OM3 structure designed for multimode 50/125. The ceramic ferrule guide and the vertical arrangement of the couplings support a clean signal path. Pre-assembled crimp/ANT splice holders and included shrink splice holders facilitate flexible organisation of the

splice points in the rack.

Technical details
- Extendable: extendable
- Fibre class: OM3
- Couplings: SC-Duplex
- With number of couplings/adapters: 6
- Coupling material: plastic
- Pigtail: 12 x SC
- Pigtail prepared: not settled
