DATASHEET

Detector, activates LED in LED Patch Cable, mit USB Schnittstelle

General data

Detector for feeding into the DualBoot® LED patch cable. The detector is simply plugged into the appropriate contact pairs on the RJ45 connector. By repeatedly pressing the button, you can choose between 4 operating states (continuous light, fast flashing, slow flashing, off), thus providing an individual setting for all lighting conditions. The detector's battery can be charged using the supplied Micro USB cable.
