DATASHEET

General data

UNIVERSAL - Smartphone holder with adhesive base, fits any flat surface such as your car dashboard (anywhere you want), desk, kitchen counter, bathroom mirror, etc. The latest adhesive technology allows you to quickly attach the substrate, ensuring a secure and lasting grip without leaving any trace of glue
FULLY ADJUSTABLE - Equipped with two 360° rotating balls, the mobile phone stand is very flexible and offers any viewing angle you want. The compact design makes it very stable and able to withstand the weight of the smartphone during the journey by car even on uneven ground. The adjustment is very practical and you can change the angle of the phone even with one hand, while driving
MAGNETIC - Using the neodymium magnet, also called "the magnetic king", the six magnetic balls give the holder a perfect suction force and hold the smartphone or tablet firmly, forming a closed internal magnetic field that has no effect on the device signal
ELEGANT - Minimal and discreet design that is well suited to the interior of the car, but also to any room where it can be used. It also allows the passage of charging cables in an easy and orderly way
COMPACT - Dimensions: 33.50 x 33.50 x 43.00 mm; Black colour

Durable adhesive for mounting on the car dashboard
Universal compatibility with double magnetic joint
Fully adjustable positioning with 360° rotation for optimal viewing of the device at all times

Package Contents
Magnetic support with double metaseal joint
