DATASHEET

General data

Additional receiver for HDMI extender IDATA-EXT-676.
It allows you to transmit the HDMI signal over long distances using a Cat. 5E / 6 / 6A / 7 network cable.
Thanks to the use of network cable, it is possible to reach up to 70m of transmission length with 4K video resolution.
Supports bidirectional IR passback with 20-60KHz frequency. The receiver can be powered by the transmitter (with transmitter connected to the power supply).
