DATASHEET

General data

The NetXpert XG2 Network and Cabling Qualifier up to 10 Gbit/s from EFB-Elektronik is designed as a CAT 6A qualifier and offers a practical solution for twisted pair testing.

• Touchscreen operation – Supports a clear display of the measurement data and makes it easier to work directly on the device.
• Measured value memory – Enables the storage of results and thus creates a reliable basis for later evaluation.
• Suitable for network protocol measurement – Extends the range of application of the qualifier and supports the assessment of cabling up to 10 Gbps.

The technical focus is on the qualification of twisted-pair routes with clear operation and documentable measurement results. The touchscreen supports handling in everyday life. The measured value memory secures recorded data for structured tracking. With its suitability for network protocol measurement, the functionality of the NetXpert XG2 as a network and cabling qualifier is sensibly complemented.

Technical details
• Brand: EFB-Elektronik
• Form: CAT 6A qualifier
• Suitable for: Twisted Pair
• Display type: Touch Screen
• Suitable for network protocol measurement: Yes
• Measured value memory: Yes
