

DATASHEET

General data

Performance tester for all Ethernet applications up to 10 Gbit/s

The NetXpert XG2-PLUS combination model offers comprehensive active and passive network testing up to 10 Gbit/s on copper and fiber cabling, for installation, commissioning and troubleshooting. The unique combination of four measurement methods, the highest reliability of the results is achieved.

For the qualification of copper lines one main and one end device is used. The qualification of fiber optic links requires 2 main devices.

SFP Transceiver are not included in scope of delivery

Scope of delivery

This datasheet was created automatically on 16-09-2026 . Technical changes reserved.

DATASHEET

- 2 NetXpert XG2 Main devices
- 1 Active Remote
- 3 power supplies
- 2 RJ45 Cat 6A Test cable, shielded
- 2 OM4 LC-Duplex Multimode-Test cable
- 2 OS2 LC-Duplex Singlemode-Test cable
- 1 Copper- und 2 Fiber adapter
- 1 Hard case case
- 1 quick guide
- 2 Upgrade-Licences per devices

Tekniske egenskaber

Available variants

ArtNr.	Bezeichnung	Model	Suitable for
NX_XG2_PLUS		Cat-6A certification set;Singlemode Fiber	Twisted Pair

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
