DATASHEET

General data

10/100/1000Mbps wire speed transmission and reception
Intergrates Non-PoE devices with Power Over Ethernet support
Safeguards network device with short circuit protection
Reduce installation and network equipment costs
Adjustable DIP switch for 12V, or 24V output
Compact splitter supports Gigabit speeds
Supplies power up to 60 watts

The LevelOne POS-5000 Gigabit High Power PoE Splitter splits a networked PoE Signal intoseparated power and Gigabit data sources. This device allows administrators to run Gigabit speed PoE cables over long distances and then split the PoE signal into separated data and power sources in order to network non-PoE devices. Active splitters are aslo available in the following output voltages (12V or 24V). Save installation and equipment cost when installing WiFi access points, (Pan/Tilt/Zoom) IP cameras and more in remote locations. No need to install network devices near a power outlet. This compact device safeguards valuable network equipment with short circuit protection and quickly creates an integrated PoE and non PoE network at Gigabit speeds.

General
Color: Black

Features

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
