DATASHEET

General data

The WireXpert MP copper certifier including multimode fibre optic module from Softing is designed as a multimode fibre optic and CAT 6A certification set. The system supports twisted pair and fibre optics and offers a practical solution for structured measurement and certification.

• CAT 6A Certification Kit with Multimode fibre – Covers twisted pair and fibre in one system, supporting a versatile network measurement application.
• LCD display – Clearly displays measurement results directly on the device and facilitates quick evaluation.
• Measured value memory and PC/printer interface – Save measurement results and support clean documentation and further processing.

For technical depth, the system is suitable for network protocol measurement and has a measured value memory as well as a PC/printer interface. The power supply is via AC 100-240 V to 12 V with a 3 A power supply. This means that the certification set is designed for a documentation-capable measurement environment.

DATASHEET

Technical details
- Brand: Softing
- Form: Multimode fibre, CAT 6A certification set
- Suitable for: Twisted Pair, fibre Optic
- Display type: LCD
- Suitable for network protocol measurement: Yes
- Measured value memory: Yes
- With PC/printer interface: Yes
- Power supply: AC 100-240 V to 12 V; 3 A power supply

Tekniske egenskaber

Available variants

ArtNr.	Bezeichnung	Model	Suitable for
WX-MPC6A-FM		Multimode Fiber;Cat-6A certification set	Twisted Pair;Fibre optic conductor

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
