DATASHEET

General data

The WireXpert 500 Set from Psiber Data GmbH is a CAT 6A certification set for twisted pair and designed as a copper cable certifier for Class D to EA. This provides a practical solution for the certification and analysis of corresponding cabling.

• CAT 6A Twisted Pair Certification Kit – Supports testing of copper links in the range of Class D to EA, covering a relevant range of applications in cabling.
• Touchscreen display – Enables direct operation and ensures a clear display of measurement information in everyday work.
• Measurement memory and PC/printer interface – Facilitate documentation, further processing and structured storage of measurement results.

The set combines the certification of twisted-pair cabling with a measurement for network protocols, thus expanding the functional range of applications in the field. The integrated measured value memory and the PC/printer interface support the traceable acquisition and output of the results. The touchscreen operation contributes to an efficient workflow and fits in with the practice-oriented design of the WireXpert 500 Set.

Technical details
• Brand: Psiber Data GmbH
• Form: CAT 6A certification set
• Display type: Touch Screen

- Suitable for: Twisted Pair
- Suitable for network protocol measurement: Yes
- Measured value memory: Yes
- With PC/printer interface: Yes

ArtNr.	Bezeichnung	Model	Suitable for
WX500		Cat-6A certification set	Twisted Pair

Note on Intended Use

This data sheet is intended solely to describe the technical characteristics of the product. It does not replace an assessment of the product's suitability for a specific application. The user is responsible for ensuring that the product is used in accordance with its technical specifications and applicable legal and regulatory requirements.
